Last edited by mroy; at I have seen it configured to load on Custom, Graphics, and Blank, and all of these on Doosan machines.. MGi is sometimes set to load with the graphics button You may need to find a copy of that machines parameters and a Fanuc book or two.. Paul, if you could get me a manual, that would be awesome Fanuc 21i-t Maintenance ManualThere are also plenty of parameters that effect 18i-tb any G code or cycle will behave.

Everything else is a gamble Honestly, attempting to write a post without a manual and no machine is an exercise in futility.. That vintage machine was right at the changeover from having to have EZ Guide-i installed in the field to having it preloaded at the factory, and only having to activate it in the field..
